

Visit PSS-Geo EAGE Booth in Madrid (CA8-9)! 1- 4 June 2015

www.pss-geo.com

New!

We will tell and show

- **Prony⁺ Filtering** — HC prediction from the Full Stack section! (Analysis of changes in the medium response of the frequency depending on type)
- **Fast track QI** (Full QI in one day!)
QI and PSS-Geo Seismic Data Attributes (come with manual)
- **"Hybrid Wave Form Inversion"** — Velocity Building models for PSDM, depth conversion and Inversion — fast, cheap, accurate!
- **DAG** — Data Adaptive Ghostbuster. Based upon true deghosting operators applied to the data (no wavelet or spectral manipulation). Proven record applications for any configuration
- Our tricks and novelties for seismic processing

We apply
only what
suits your
Seismic!
